

Quick Order Form 1.5

What does it do :

This quick order add-on allows your clients to have access to an order form directly from the name or reference of the product. Your clients fill in the reference or name, select the product from the proposed list and choose the desired model as well as the quantity. They do the same thing for all the articles they wish to buy and click on the order button to add the group of products to their shopping basket.

This purchase will enable you to increase your clients satisfaction and reduce the time to order.

The advantage for your clients :

- ⤴ Quickly order the desired product(s).

The Quick Order add-on 1.5 is fully compatible and functional as from PrestaShop 1.5

Installation :

- Unzip .zip file
- Move «quickorderform15» folder in your module directory
- In you Back Office, in «Modules» tab, click on «Install» on the corresponding line «Quick Order Form 1.5 »
- Finally, copy the “Search.php” file from the extracted folder “patch” to your website’s folder “override/classes”

That’s it your new module is now installed and ready to use!
